THE UNIVERSITY MACE

The University Mace carried by the Chief Marshal, Professor Carl F. Christ, was first used at the 1954 Commemoration Day Exercises. Eight symbols are hand wrought in sterling silver on an ebony staff. The symbols represent man's cultural development from ancient times, through the Middle Ages and the Renaissance, to the modern era.

THE PRESIDENTIAL INSIGNIA

University President Lincoln Gordon is wearing the Presidential Insignia signifying the authority vested in the President by the Board of Trustees. It is a chain of sterling silver links worn around the neck. Portraits of each of the nine Johns Hopkins University presidents are engraved on the faces of nine of the links. On the reverse are engraved the names and dates of office of each President. Eleven blank links for future use are included. The University Seal completes the design.

ACADEMIC DRESS

The custom of wearing academic dress stems from the Middle Ages, when scholars were also clerics and wore the costume of their monastic order. The hood was originally a cowl attached to the gown, which could be slipped over the head for warmth. The cap, originally round, later became the square mortar-board as we see it today.

Today the cap is the same for all American degrees, although the recipient of a doctoral degree is entitled to wear a gold tassel. The gown varies for the respective degrees. The Bachelor's gown is worn closed and can be distinguished by its long, pointed sleeves. The Master's gown is designed to be open with the arms worn through the slits in the elbows of the sleeves. The Doctor's gown, also worn open, has full, bell-shaped sleeves with three horizontal bars stitched across the upper arm. There is a velvet panel draped around the neck and stitched down the front edges. This velvet trimming may be either black or the same color as the velvet border of the hood.

The hood also varies for the respective degrees. The Bachelor's and Master's hoods are of the same design, pointed at the base. The Bachelor's hood is three feet long; the Master's hood is three and one half feet long. The Doctor's hood is four feet long, of fuller shape and rounded at the base.

The hood is bordered with velvet, the color of which indicates the field of study in which the degree was earned:

Dark blue — Philosophy
Light blue — Education
Orange — Engineering
Gold-yellow — Science
Green — Medicine
Salmon pink — Public Health
Pink — Music
Purple — Laws
White — Arts and Letters

The silk lining of the hood represents the institution which granted the degree. If more than one degree is held, the gown and hood of the higher or highest degree is worn. The Johns Hopkins University has adopted an alternative costume to be used by all holding Johns Hopkins doctoral degrees, both earned and honorary. The costume will consist of a gold robe with front and side panels in sable velvet and a six-sided, Dutch academic cap with gold sweatband and tassel. The linings seen in today's academic procession may include:

Black, old gold chevron — Johns Hopkins	Purple — New York University
Light blue, white chevron — Columbia	Bright red — Wisconsin
Dark blue — Yale	Plum, with scarlet — London
Blue with white chevron — Duke	Maroon — Chicago
Dark blue, two orange chevrons — Illinois	Crimson — Harvard
Light blue, two white chevrons — North Carolina	Carnelian, two white chevrons — Cornell
Old gold, maroon chevron — Minnesota	Cardinal — Stanford
Old gold — Iowa	Red, tri-chevron in center — Heidelberg
Gold, blue chevron — California	Dandelion yellow — Michigan
Gold — Virginia	Maize, azure blue chevron — Sorbonne
Purple, gold chevron — Northwestern	Yellow and white — Rochester

CITATIONS FOR HONORARY DEGREES

HALDAN KEFFER HARTLINE

for the Degree of Doctor of Laws

With this award the University honors one of its distinguished sons, a Nobel Laureate in Physiology, and a man with a deep appreciation of nature. His investigations of simple and complex visual systems led him to formulate the fundamental concepts and theoretical structure with which he deciphered some of the cryptic messages that travel from the eye to the brain. This remarkable achievement is far more than a tantalizing look at how the nervous system works. With it the darkness of perplexity that has shrouded the physiology of behavior has been lifted. His concepts, his analytical orientation, now known to be valid at higher integrative levels in the brain, are a cornerstone of modern neurophysiology.

Mr. President, it is for me a singular privilege to present to you for the honorary degree of Doctor of Laws, Haldan Keffer Hartline.

HARRISON SCOTT BROWN

for the Degree of Doctor of Laws

In awarding this degree, the University honors not only a distinguished scholar but also one of its own graduates and former faculty members. He has received a number of scientific awards and honorary degrees in recognition of his many contributions to science and the country. He received his Ph.D. in chemistry from Johns Hopkins in 1941. He is a broad and versatile scholar, and a citizen of the world. His interests span subjects from chemistry and physics to problems of population explosion, disarmament and the future of mankind. He is Professor of Geochemistry and Professor of Science and Government at the California Institute of Technology, and he is also the Foreign Secretary of the National Academy of Sciences.

Mr. President, it is my privilege to present to you for the honorary degree of Doctor of Laws, Harrison Scott Brown.

MARTIN D. JENKINS
for the Degree of Doctor of Laws

Martin David Jenkins has been the President of Morgan State College since 1948. The continued growth, viability and visibility of this institution, attained during his years of stewardship, is testimony to his administrative skills. In the fields of psychology and education his scholarship has been equally impressive. The academic world is fully aware of these attainments and has honored him accordingly, but today The Johns Hopkins University honors Martin David Jenkins more as a humane and concerned individual than as a proven administrator and scholar, an individual who, through dedication and persistence, has given generously of his time and talents to the social betterment, improvement and educational opportunity and dignity of all young people. Through membership and activity on numerous boards and commissions, he has made his far-sighted philosophy felt on the local, regional and national scene, and under the auspices of the United States Department of State his views have been heard in the nations of Europe and Africa.

Mr. President, speaking for the students, faculty, administration and trustees of The Johns Hopkins University, we are honored to have this man join the Johns Hopkins community. I present Martin David Jenkins to you for the conferring of the degree of Doctor of Laws.

ABEL WOLMAN
for the Degree of Doctor of Laws

Abel Wolman has devoted his life to the continuing search for ways of securing a healthy life for men everywhere. A teacher in any company, he combines wisdom and wit in bringing scholarship to statecraft. When many appear to despair of the present and to lose hope in the future, it is fitting that we honor a man who has struggled with the problems of society with enthusiasm, with faith in men, and with an optimism born not of ignorance, but of recognition of the slow-growing, yet tangible fruits of the democratic process.

Mr. President, it is my privilege to present to you for the honorary degree of Doctor of Laws, Abel Wolman.

WILLIAM BENNETT KOUWENHOVEN
for the Degree of Doctor of Medicine

In awarding this degree, the University offers its unique recognition of a man who has served her faithfully for more than half a century. William Bennett Kouwenhoven joined our faculty in 1914, and in the intervening years has enjoyed two full and rewarding careers. His first contributions were in Electrical Engineering, where he distinguished himself as investigator, teacher, departmental chairman and Dean. His retirement to Emeritus status in 1954 merely permitted him to devote his full energies to his second career, pioneering the discipline of Biomedical Engineering. He has made many contributions to science and society, and has received many honors in acknowledgement of his lifetime of service. His studies of the effects of electricity on the human body led to a complete change in cardiopulmonary resuscitation. This stands as one of the most significant discoveries in medical science of this century.

All of us have been enriched by our association with this man. He has brought distinction to this University, and inspiration to our students and faculty. It is only fitting that we recognize his services to science and mankind by honoring him in this special way.

Mr. President, I take pleasure in presenting William Bennett Kouwenhoven for the honorary degree of Doctor of Medicine.

KINGMAN BREWSTER
for the Degree of Doctor of Laws

Historians tell us that institutions as well as societies reach a high stage of development by meeting and overcoming challenges with which they are confronted. If level of challenge thus determines achievement, then higher education stands today on the brink of a renaissance the like of which the world has never seen.

As a university president, the candidate we honor today has led the way in a creative response to the need for change. Under his leadership, Yale is no longer a monochromatic Old Blue institution. It includes voices from all sectors of society and this fall the glee club will for the first time have its own soprano section, as girls as well as boys join the freshman class. In this as in other ways, our candidate has demonstrated that an institution of higher education can use a time of troubles to find a new vitality, by seizing opportunities that would never be open in a more tranquil environment.

Mr. President, it is my privilege to present to you for the honorary degree of Doctor of Laws, the President of Yale University, Kingman Brewster.

CHARLES S. GARLAND, SR.
for the Degree of Doctor of Laws

Mr. President I have the honor to present to you for the degree of Doctor of Laws, Charles Stedman Garland, distinguished resident of this city, respected leader in the nation's financial community, and devoted Chairman of the Board of Trustees of this University for a decade.

Seldom in the history of any University has one Trustee exercised so much positive influence on its growth and development as Charles Garland has at Johns Hopkins. With wisdom gained at Yale and honed in the halls of business and finance; with vigor developed in his days as a world tennis champion; and with uncommon interest in higher education nurtured through his affection for Johns Hopkins, Charles Garland will be remembered for the major role he played in bringing this University to new and higher levels of distinction in academe and in the world beyond the campus.

His leadership was largely anonymous for many. But those of us who have been privileged to know him well are at once struck by his incisive mind, his friendly manner, and the grace with which he conducted all of his tasks.

Mr. President it is especially fitting, on this day when we honor another gentleman from New Haven, that we recognize one of Yale's most remarkable alumni—Charles Stedman Garland.

FRANCES P. BOLTON
for the Degree of Doctor of Laws

Distinguished legislator, dedicated internationalist, and wise and generous philanthropist, Frances P. Bolton represents the best in American life. For nearly three decades she served as a member of the House of Representatives' Committee on Foreign Affairs.

We at Johns Hopkins have a particular reason to honor Mrs. Bolton. As one of the founders of the School of Advanced International Studies and a member of its Advisory Council, she has served the School with loyalty and wisdom for 25 years.

We recognize Frances Bolton today for all of these achievements, but above all we honor her as a person of courage, devotion, human understanding and integrity who has won the admiration and affection of the many in all walks of life who have had the good fortune to know her.

Mr. President, it is a great personal privilege to present to you for the honorary degree of Doctor of Laws, the Honorable Frances P. Bolton.

THOMAS ROBERT SHANNON BROUGHTON
for the Degree of Doctor of Laws

Thomas Robert Shannon Broughton came to Baltimore from Toronto to take his doctorate with the celebrated classicist, Tenney Frank. After teaching at Bryn Mawr, where he wrote his monumental volumes on *The Magistrates of the Roman Republic*, he went to the University of North Carolina as Paddison Professor of Classics. His writings have preserved and enhanced the serious tradition of scholarship inaugurated on this continent by The Johns Hopkins University; but, better still, his character has exemplified the observation of the most renowned of Roman magistrates, Marcus Tullius Cicero, that "these studies nourish our youth, make pleasant our old age, are ornaments in prosperity, and a refuge in misfortune."

Mr. President, it is my privilege to present to you for the honorary degree of Doctor of Laws, Thomas Robert Shannon Broughton.

THE UNIVERSITY ODE

Truth guide our University
And from all error keep her free;
Let Wisdom yield her choicest treasure,
And Freedom reach her fullest measure;
Oh, let her watchword ever be
The truth of God will make you free,
Will make you free!

THE UNIVERSITY MOTTO

Veritas vos liberabit.
The truth shall make you free.

—St. John 8:32
